Follow manufacturer's installation recommendations. Correct seam sealing is necessary to prevent seam breakdowns. For best results, seams must be row cut and the carpet must be dry laid to optimize pattern match. Due to dye lot variations, actual material may vary slightly from samples. The manufacturer reserves the right to modify the specifications to improve the product without notice and without prejudice. *Percentages of recycled content are accurate at date of printing. The availability of these inputs could fluctuate over time. See krausflooring.com for latest specifications.
